

I object to changes to Indiana state telephone privacy laws or to any other states telephone privacy laws. If implemented this ruling would cause a reduction in my states privacy laws. This has dramatically reduced my telephone calls from buisnesses that keep calling during dinner and the evening. If called they can be fined by the State. In the last year I have received only 2 calls with them apoliging and stating they would not call back. Implamentation of your regulation shouldn't limit my states regulatory right to less than hoosiers had voted in. If you should implement this ruling it should allow the stiffer reg (state or federal) to take presidence.
